Professional Summary

I have 5+ years of experience designing consumer products across embedded hardware, mobile, tablet, and web, and across teams in the US, EMEA, India, and China. Specializing in multi-modal interactions and turning complex requirements into intuitive, build-ready design from discovery to production.

Skills

- **UX & Interaction Design:** User flows, information architecture, interaction design, wireframing, prototyping, design systems, responsive design, accessibility, design audits
- **Visual Design:** Typography, color, iconography, layout and spacing, visual hierarchy, high-fidelity UI motion and micro-interactions, visual systems, brand and identity
- **Research & Strategy:** User research, usability testing, concept validation, problem framing, design strategy, end-to-end product design, cross-functional collaboration
- **AI & Emerging Technology:** Generative AI, prompt engineering, AI-assisted design workflows, AI-powered prototyping, AI-assisted research synthesis, workflow automation, human-AI interaction design, AI product UX

Tools

Figma, ProtoPie, Adobe After Effects, Framer, Adobe Illustrator, ChatGPT, Claude, Figma AI, Google Stitch, Codex, Aura, Cursor

Languages

English (Fluent), Hindi (Fluent), Japanese (JLPT N5 level, studying for N4)

Work Experience

{All projects done under Non Zero}

Interaction Designer | Non Zero Design studio *New Delhi, India | Jul 2022 - Present*

- **Whirlpool Corporation Connected Home Appliances (Primary Designer | Jul 2022 - Aug 2025):**

  - Led interaction design for 10+ connected appliance programs across Whirlpool, Maytag, KitchenAid, and JennAir, designing embedded HMIs across 2″ to 7.8″ displays using touch, non-touch, knob, button, and dial interactions.
  -Translated legacy text-based engineering documentation into reusable visual interaction specifications and interactive prototypes, reducing clarification time by ~70% while creating a scalable source of truth for engineering.
  -Built a reusable interaction design system for dot-matrix and seven-segment displays. Validated concepts through usability testing across US, EMEA, India, and China.

- **Keurig Connected Coffee Brewers - IoT (UI/UX Designer | Jan 2025 - Dec 2025):**

  - Led UX and visual design for two connected coffee brewers, including a new touchscreen experience and a commercial brewing interface.
  - Designed task flows for brewing, personalization, and device setup under real-world hardware constraints.
  - Validated interaction models with physical prototypes and user testing before engineering handoff.

- **PeakPause Health Records App (Product Designer | Mar 2025 - Jan 2026):**

  - Designed an end-to-end mobile health platform from research and information architecture to high-fidelity UI and interactive ProtoPie prototypes.
  - Conducted interviews, field research, and usability testing with 16 participants, reducing task completion time by nearly 49% through navigation improvements.

- **JB Air Connected Smart Air Purifier (UI/UX Designer | Apr 2026 - Jun 2026):**
  - Led interaction design for embedded HMI (onboarding, AQI monitoring, routines, companion app interactions), delivering production-ready Figma specifications.
  - Designed launch website contributing to a launch that sold out its first run of 200 units. Proposed JB Labs and JB Health trust-building sections, leveraging AI-assisted workflows to

reduce iteration time from 7-8 days to 1-2 days.

UI/UX Design Intern | Kilobyte *New Delhi, India | Feb 2022 - Apr 2022*

- Designed wireframes, user flows, and high-fidelity interfaces for early-stage digital products, collaborating with senior designers and engineers.

Product Leadership

Lead UX Designer | Reborn Goods Internal Venture (In Development)

- Leading product strategy and end-to-end UX for a two-sided marketplace, defining product requirements, PRDs, MVP scope, feature prioritization, and roadmap through continuous customer discovery.
- Partnering directly with brands and vendors to map workflows, validate opportunities, and translate research into user flows, prototypes, and executive presentations.
- Building AI-assisted design workflows to accelerate ideation and concept validation.

Product Designer |Veyra (Ongoing)

- Leading end-to-end design for a connected pet wearable and companion app launching in India, covering information architecture, a tokenised design system with light and dark modes, and 60+ screens across a free and premium tier.
- Benchmarking incumbent trackers against India's connectivity and hardware reality, then reframing the feature set around what the device can actually deliver and surfacing the unresolved architecture questions to the client's R&D team before build.
- Translating the prototype into a scenario-led narrative for client and investor presentations, mapping each feature to the moment it earns its place.

Education

B.Tech, Information Technology *2018 - 2022*
G.B. Pant University of Agriculture & Technology (GBPUAT)
